DE-ICING SALT Egypt

Manufacturing Process:

Sodium chloride
Obtained by extraction of the rock salt

Origin: Egypt

Physical specifications:

Aspect: White crystals Apparent density: $1,20 \pm 0,05\text{g/cm}^3$
Typical granulometry: 5 mm – 95%
4 mm – 53%
0.8 mm – 19,9%
0.16 mm – 4,7%

Chemical specifications:

	Typical value	Analysis method	Test methods
NaCl	98,8%	DIN EN ISO 10304-1	DIN 66165-2:1987-04
Humidity	2,8%	ISO 2483	
Anti-caking agent E535	150 PPM	DIN EN ISO 14403	
SO4	< 0,7 %	DIN EN ISO 10304-1	

Packaging:

Bulk
Big bags 600 kgs / 1 ton
Bags 25kg on pallets 100x120 = 1T225

Recommandations:

The product should be stored in a dry place.
Not classified as dangerous good in accordance with current transportation norms.
